

Muhammad Ubaid

Staff iOS Engineer | Mobile Team Lead

m.ubaid.77@gmail.com | +92 345 5220877 | Islamabad, Pakistan | m-ubaid-77.github.io | github.com/m-ubaid-77

PROFESSIONAL SUMMARY

Staff-level iOS & Mobile Engineer with **12+ years** delivering production-grade iOS, Android, and Flutter applications across fintech, mapping, insurance, and consumer products. Deep expertise in **SwiftUI, UIKit, Clean Architecture, CI/CD, automated testing, and SDK development**. Proven across both individual-contributor and **Mobile Team Lead** roles — owning system architecture, mentoring engineers, and driving end-to-end delivery for enterprise clients including one of Australia's largest investment managers.

CORE SKILLS

Languages: Swift, Objective-C, Dart, Kotlin, JavaScript

iOS & Mobile: SwiftUI, UIKit, Combine, Swift Package Manager, CocoaPods, WKWebView, Core Data, AVFoundation, Flutter, Android

Architecture: Clean Architecture, MVVM-C, MVVM, Repository Pattern, Dependency Injection, BLoC, Modular Feature Design, SDK Design

Quality & Delivery: Unit & UI Testing, TDD, GitHub Actions CI/CD, Git, Agile/Scrum, Code Review, Technical Mentoring

Leadership: Team Leadership, System Architecture, Sprint Planning, Client Communication, Cross-functional Delivery

WORK EXPERIENCE

GitStart (*Y Combinator S19*)

Oct 2020 – Dec 2025 · Remote

Mobile Team Lead — iOS, Android & Flutter

- Led mobile delivery for a portfolio of international clients — owning system architecture, technical direction, estimates, and end-to-end release across iOS, Android, and Flutter.
- Managed and mentored engineers through **code reviews, pair programming, and technical guidance**, raising code quality and team velocity.
- Standardized engineering practice across projects: **Clean Architecture, dependency injection, automated testing, and GitHub Actions CI/CD** to catch issues before review.
- Ran **sprint planning, backlog grooming, and milestone definition**, and served as the primary technical point of contact for clients on requirements, solutions, and ETAs.
- Delivered flagship client projects including **Betashares Direct, Revi, CitySavings (UBX)**, and the **Coherent Spark iOS SDK** (see Key Projects).

Roostoo Labs · Hong Kong

Feb 2025 – Dec 2025 · Remote

Senior Software Engineer — Flutter (*Part-time*)

- Owned end-to-end delivery of a cross-platform crypto-trading simulator (**Roostoo**) serving **10K+ users** across iOS, Android, and Web.
- Modernized the codebase from **Flutter 1.x** → **3.27.1**, enabling null-safety and web support while significantly improving performance and long-term maintainability.
- Designed scalable architecture and **GitHub Actions CI/CD**, automating builds, tests, and deployments in close collaboration with product and backend teams.

TPLMaps · Pakistan's leading location-data company

May 2017 – Oct 2020 · Islamabad, PK

Assistant Manager — iOS Development

- Built core features for the **TPLMaps** and **TPL Insurance** iOS apps — live location sharing, navigation, geofencing, favorite locations, Urdu speech-to-text search, and direct-to-consumer insurance flows.
- Developed reusable components for the in-house **mapping-services iOS SDK**, enabling robust map features across multiple apps.
- Applied **TDD** and clean architectural patterns (MVC, UIKit, Storyboards) to ship maintainable, high-quality code.

Dancom Pakistan Pvt. Ltd

Dec 2016 – Apr 2017 · Islamabad, PK

Senior Software Engineer — iOS

- Developed and maintained company iOS applications (Shaadeepk, JobAlertz, Tutoria), integrating RESTful APIs with efficient data handling.
- Collaborated with designers, backend engineers, and QA to deliver high-quality user experiences.

Whizpool

Feb 2013 – Nov 2016 · Islamabad, PK

Software Engineer — iOS

- Built multiple iOS apps from scratch to App Store submission using sensors, location APIs, push notifications, REST APIs, SQLite, Core Data, and AVFoundation.
- Managed memory across ARC and non-ARC codebases and built responsive UIs with XIBs, Storyboards, Auto Layout, and size classes.

KEY PROJECTS

Betashares Direct — Betashares (Australia), via GitStart

iOS · Swift · Android

- Contributed as an **iOS & Android engineer** to **Betashares Direct** — the consumer investing platform of **Betashares, one of Australia's largest investment managers (\$75B+ AUM, 1M+ investors)**, backed by a **A\$300M investment from Temasek** and named Finder's Best ETF Investing Platform 2026.
- **Redesigned and refactored the in-app Support section** (including in-app chat) across **iOS and Android**, and fixed broken in-app previews — improving reliability and long-term maintainability of the support module.
- Improved the **Android markdown parser and rendering** powering help/support content, delivering cleaner and more consistent formatting.

Revi — Revi Technologies, Online Food Ordering & Delivery

iOS · SwiftUI

- Rebuilt a legacy UIKit product into a fully **SwiftUI** app as the **solo engineer**, delivering an end-to-end App Store release.
- Designed a scalable **MVVM-C + Repository architecture with DI**, and achieved **70% automated test coverage** (Unit + UI) with GitHub Actions CI/CD from the first commit.

CitySavings SA — Bike Loan App — UBX, 4th-largest thrift bank in the Philippines

Flutter · BLoC

- Led a **5-member team** to deliver a **25+ screen** end-to-end loan app — product selection, KYC, document handling, approvals, and offline support for field agents.
- Shipped within a challenging **1-month timeline**, helping **UBX win a project with the fourth-largest thrift bank in the Philippines**; built with Flutter, Clean Architecture, and BLoC for cross-platform mobile and web.

Coherent Spark iOS SDK — Coherent, Insurance-tech

iOS · Swift · SPM · CocoaPods

- Developed and published an **iOS SDK** via **Swift Package Manager and CocoaPods** for seamless integration of insurance products.
- Abstracted a complex JavaScript setup behind a clean native API, with a modular JS wrapper and **Factory-Pattern bootstrapper over WKWebView** for reliable initialization and a better developer experience.

Roostoo — Roostoo Labs, Crypto Trading Simulator (10K+ users)

Flutter · iOS · Android · Web

- Cross-platform crypto-trading simulator delivered to **10K+ users**; modernized Flutter 1.x → 3.27.1 with null-safety, web support, and CI/CD.

Stepora & ScanSeek AI — MUCO Apps, self-published

iOS · Swift · SwiftUI

- Independently designed, built, and published App Store products: **Stepora** (step & hydration tracker) and **ScanSeek AI** (AI-powered on-device screenshot search).

EDUCATION & LANGUAGES

B.E. Information Technology

2009 – 2013

UET Taxila (KICSIT) · Rawalpindi, Pakistan

English — Professional Working Proficiency

Urdu — Native
